

1470. Shuffle the Array

```
class Solution(object):  
    def shuffle(self, nums, n):  
        list1=[]  
        for i in range(n):  
            list1.append(nums[i])  
            list1.append(nums[i+n])  
        return list1
```
